

Project - Adidas CaseStudy **(Enhanced Visual using Filter + Relationship)**

Dear Innominion,

Congratulations on successfully completing your first milestone of your Power BI journey!

Your dedication to visualizing data has been commendable, and now it's time to take the next step.

The goal of this assignment is to deep dive into the Adidas sales database, extracting crucial insights to enhance sales performance and refine business strategies. Through a comprehensive analysis of sales data, our aim is to pinpoint influential factors, detect trends, and unveil potential avenues for expansion. Employing Advanced Power BI visualizations and filters, we'll create an interactive dashboard, offering an in-depth and interactive view of the information.

Here's a breakdown of your task:

Your challenge is to replicate the visualizations exactly as given below which should be done in Power BI.

Step 1: Data Source:- Here is the Adidas dataset file link

https://drive.google.com/drive/folders/1g-4Oc0rJjOASYB4yFKYxkClgv_OQdeaU?usp=drive_link

Step 2: Page Structure: create the visualizations based on the below given description

Remember, some parts might require a bit of additional research or homework.

1. **Overall Performance Metrics:** Track Total Sales, Total Profit, Average Price per Unit, and Total Units Sold to visualize the overall business performance.
2. **Profit Analysis by Retailer:** Assess total profit generated by each retailer to identify top-performing retailers and their contributions.
3. **Sales Trend Over Time:** Monitor sales trends across various timeframes - year, quarter, month, and day - to understand patterns and fluctuations.
4. **Product Category Sales Distribution:** Analyze sales distribution across different product categories to pinpoint top-selling categories and their contributions.
5. **Units Sold by Product Category and Gender:** Explore customer preferences by analyzing total units sold across product categories and gender types.
6. **Effective Sales Methods Comparison:** Determine the most effective sales methods by comparing the performance of different sales channels.

7. **Regional Sales Analysis:** Explore variations in sales data across regions, states, and cities to identify potential areas for improvement or targeted strategies.
8. **Top Performing Cities by Profit:** Identify the top 5 cities based on profit to gain insights into their successful sales strategies.

Remember, this exercise aims not only to create visuals but to make you experience how the real world projects are done

Note ▶ : Kindly get it reviewed by the @mentors after the Submit in the LMS and Update CV / Resume

After the completion of the project add project to your profiles such as

1. LinkedIn,
2. GitHub
